September 1, 1995

Dear Final Writer user,

Hello. Not long ago I mailed you a special upgrade offer to the new Final Writer Release 4.

Release 4 is a significant upgrade to Final Writer. Along with feature enhancements, the user interface has been redesigned, a new grammar correction system implemented, and the user manual rewritten. From the reaction of people who have upgraded, Version 4 is well worth the \$30.00 upgrade fee. Here are a few quotations and comments we have received:

"Wow! Final Writer 4 just arrived in the mail. So far this looks like the best upgrade yet. Release 3 compared to Release 2 was closer to a 2.5, but Release 4 compared to Release 3 is really like a 4!...",

"FW4 is unbelievable! I really like the section and page click tabs. Now it is so easy to navigate through my documents...",

"You guys did it again. The grammar checker is great! Congratulations on useful improvements to an already terrific product...",

"...I upgraded from Release 1 and was completely surprised at how much work has been put into Final Writer since I bought it over a year ago. I am glad I made the jump to Release 4...",

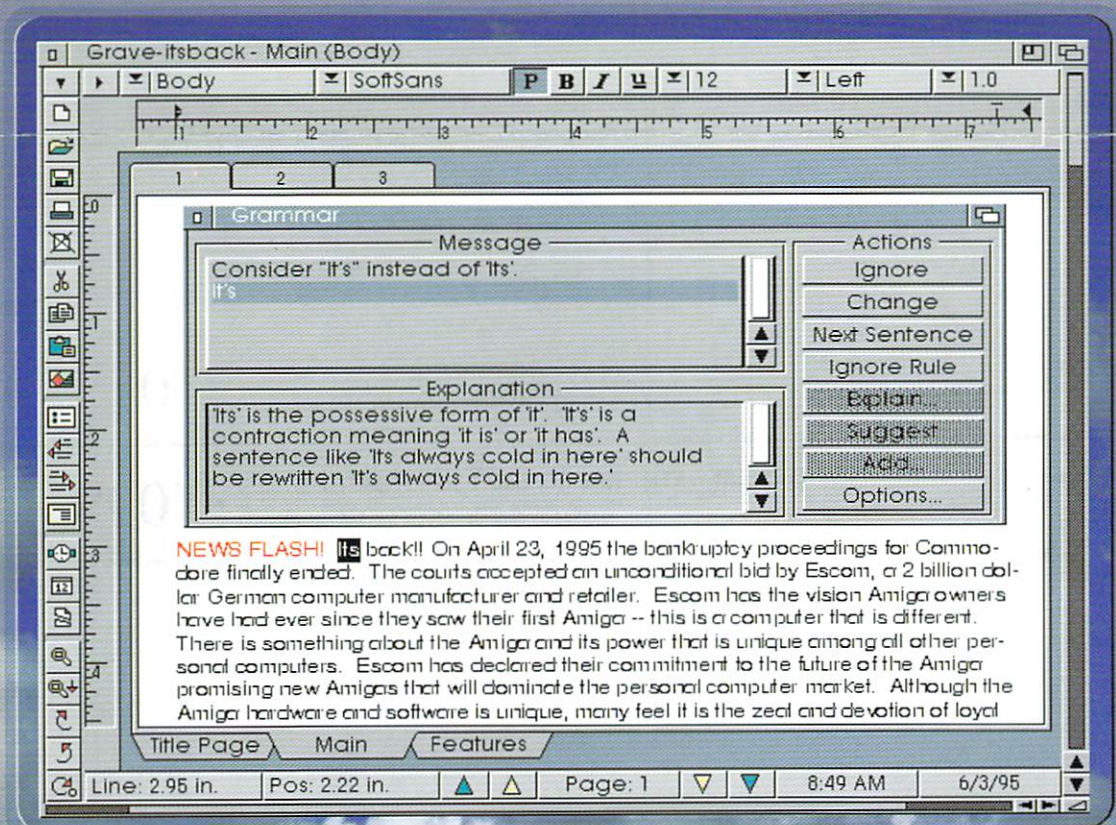

The Amiga is back, and this **\$30.00** upgrade is an **excellent opportunity** to stay current with the best word processor on the Amiga. In hopes that you want the upgrade, but for one reason or another have not ordered it, I am extending the \$30.00 upgrade offer to you through **October 15, 1995**. After October 15, 1995, the special upgrade offer will expire, and the upgrade fee will be \$50.00. As always with SoftWood products your **satisfaction is guaranteed**. If you are not happy with Release 4, you have 30 days to return it for a full refund--no questions asked. Call **800-247-8314** or use the enclosed form to order your upgrade today. I know you will find Release 4 well worth the money.

Sincerely,

Woody Williams
President, SoftWood, Inc.

Final Writer

Release 4
from
SoftWood

Final Writer

Highlights:

- Voted "1995 Product of the Year" by readers of Germany's largest Amiga magazine.
- Includes 120 outline fonts that can be printed to either graphic or postscript printers.
- Includes 100 EPS clip-art images that can be printed to either graphic or postscript printers.
- Comprehensive user manual that is well written and easy-to-follow. *
- Excellent quality printing to any Workbench supported graphic or PostScript printer.
- Extremely easy to learn and use. *

Word Processing Features:

- 144,000 word spell checker
- Grammar correction *
- Automatic hyphenation option
- Paragraph style sheets
- Multiple sections
- Index generation
- Bibliography
- Multiple columns
- Text clips (Saved formatted text)
- Left, right, center, and decimal tabs
- Insert current date
- Automatic page numbering
- Easy header and footer creation
- Type and spell (spell as you type)
- Automatic document save at timed intervals
- 1.4 million word thesaurus
- Readability statistics *
- Dictionary or algorithmic hyphenation
- Multiple left/right master pages
- Table of Contents generation
- Table of Illustrations generation
- Endnotes generation
- Very fast search and replace
- Header / Footer support
- Left, right, center, and full text alignment
- Insert current time
- Drag and drop text editing
- Easy page numbering
- Multiple language capability
- Enhanced text selection

User Interface:

- Undo / redo
- Configurable "User" menu
- Movable floating palettes for styles, commands, and user buttons
- Information / status strip with line and char. position, go to page, and date/time
- Configurable "User Button Strip"
- Move "User Button Strip" to left, right, top, or bottom window border *
- Click tab access of pages, sections, and requester areas *
- Easy toggle access of command strips *

Outline Font Support

- Size fonts from 4 to 300 points
- Line spacing control
- Underline, strike-thru, and small caps
- Color text
- Compugraphic, Type-1, and NimbusQ
- Compress / Expand character widths
- Superscript and subscript
- Easy bold and italic setting *

Graphic Support:

- Import IFF ILBM and EPS images
- Draw boxes, ovals, lines, polygons and special shapes
- Rotate graphics and text blocks
- Scale and crop graphics to any desired size
- HAM, 24 bit, and Extra Halfbrite support
- Create, move, and resize text blocks
- Real-time text flow around any graphic or text block
- Group / Ungroup graphics

Printing

- Print at full resolution of printer
- Built-in PostScript™ support
- Print EPS images to any printer

System Requirements

- Amiga with 2.5 megabytes of RAM
- Hard drive
- Workbench 2.04 or higher

* Denotes either a new feature or an existing feature that was modified in Release 4.

SoftWood, Inc.

Dear SoftWood customer,

It's here!

If you are one of the thousands of Amiga owners that have been waiting for Final Calc, wait no longer. SoftWood is very happy to announce the release of Final Calc, the only true spreadsheet program for the Amiga. Over four years have gone into the development and refinement of Final Calc. When we showed Commodore an early version of Final Calc, their management took us aside and told us to do whatever was necessary to bring Final Calc to market as quickly as possible. They knew the importance of having a first-rate spreadsheet for the Amiga. Unfortunately for Commodore, Final Calc would not be completed in time for it to help them with Amiga sales. Now the Amiga has been reborn through Escom and Amiga Technologies. It is only fitting that Final Calc be part of the Amiga's rebirth.

Your special offer

Final Calc has a suggested retail price of **\$249.00**. To introduce Final Calc to the Amiga community, SoftWood is making you and other registered owners of SoftWood products a specially priced offer. This special price is lower than you will ever be able to buy Final Calc for either through mail-order or dealers. However, to be fair to resellers, we can only offer you this special price for a limited time. From now through September 30, 1995 you can purchase Final Calc direct from SoftWood for **\$99.00** which is 60% off of the suggested retail price. After September 30, 1995 the special price will not be available.

New packaging

Final Calc's user manual comes in an attractive three-ring binder. The three-ring binder fits neatly into its own hard-cover slipcase. The slipcase and binder can be set upright on a desk or shelf. Although the ring binder and slipcase is at least twice as expensive to produce as packaging we have used in the past, it is superior in usability, appearance, and value. Whenever there are additions to the program or corrections to the manual, we will simply send you the pages, and you can insert them into your binder. You will never see an addendum booklet for Final Calc. Final Calc's manual is over 400 pages and the ring-binder provides the only practical way of using the manual. No expense was spared producing Final Calc, and no expense has been spared in its packaging.

How to order

You can place your order for Final Calc by calling 800 247-8314 and using your Visa or MasterCard. If you prefer to order by mail, fill out the order form on the back of this letter along with a check, money-order, or credit card authorization and mail it to SoftWood at the address shown on the form. Fax orders are also accepted. Please allow five days for your check to clear.

Thank you for using SoftWood's products. Final Calc is the most important new program to be produced for the Amiga in years. If you use spreadsheet programs, you will want to use Final Calc.

Sincerely,

Woody Williams

Final Calc

Spreadsheet

SoftWood

Final Calc - Superior Spreadsheet Power

Final Calc is the most powerful spreadsheet on the Amiga. All other Amiga spreadsheet programs are toys compared to Final Calc. Below are highlights of Final Calc's many features:

User Interface

- Projects can contain up to 254 sheets.
- Sheets contain up to 18,277 columns and 65,000 cells.
- Multiple open views per project.
- Duplicate keyboard/mouse commands.
- Unlimited undo and redo of events.
- User-defined fonts for interface.
- Supports inches or centimeters.
- Single to single, single to multiple, and multiple to multiple cut, copy, and pastes.
- Formulas automatically offset during paste, with user control over the process.

Cells

- Numeric, string, date, time, scientific, bool, currency, and percent cell types.
- Line and border drawing.
- Use any font at any size in bold, italic, underlined, reversed, and shaded text styles.
- Hidden and protected cells.

Fonts

- Supports NimbusQ, Type-1, and Type-3 fonts.
- Translation list from Amiga bitmap to outline fonts allows user to work in a fast, easy-to-read display yet print using quality outline fonts.
- Font builder builds bitmap fonts from outline fonts.

Recalc System

- Recalcs done in separate background process. User never waits for recalc to be performed.
- Natural recalcs--true formula relationship analysis.
- Circular references supported.
- Minimal recalc--only cells needing recalculation get recalculated, not the entire project.
- Solve problem capability: Reverse-solve of formula to get specific input from a required output.
- Analyze recalc errors: shows report of all errors in project and what caused each one.

Toolbox

- True multi-variate regression analysis, sorting, search and replace, and document recovery.

Formulas

- Math operators: +, -, *, /, ^, and % (modulo).
- Comparison operators: =, <, <=, >=, >.
- Logical operators: AND, OR, NOT.
- String concatenation.
- 178 math functions. Supports infinity values.

Printing

- High-quality outline font output to any printer, with direct support for PostScript and Preferences printers.
- Print spooler: All printing is done in background.
- Scaling, AutoFit, Portrait and Landscape printing options including page preview.
- Black and white, grayscale, and color output.
- Output estimates: The number of pages to be output is shown live while print job parameters are edited.

Import and Export

- Reads and writes Lotus 1-2-3 .WK1 files.
- Sophisticated text processing with user definable field and record separators, field order, and selectable fields.

Graphs

- 2D and 3D graphs with individual user control over each graphic object. Supports line, bar, stacked bar, area, stacked area, pie, B-spline, X-Y, X-Y-Z charts.
- 3D graphs: True 3d rendering, live control of 3d axis as well as individual axis size and position.

Animation

- Any graph can be animated through time.
- Very powerful animation control allowing modification of sheet data or graph settings between each frame.
- Animations support 2D and 3D graphs and can be played on screen or saved for ANIM file generation.

Scripts and Macros

- Over 650 commands support local or ARexx scripts.
- User-definable macros complete with script recorder.

Option	Price	Products	Save Up To
A	\$30.00	Final Writer 4 upgrade	
B	\$60.00	Final Writer 4 upgrade 1 product of your choice from list below	\$30.00
C	\$110.00	Final Writer 4 upgrade 3 products of your choice from list below	\$80.00
D	\$155.00	Final Writer 4 upgrade 5 products of your choice from list below	\$135.00
